Added button to the html to delete all the checked tasks

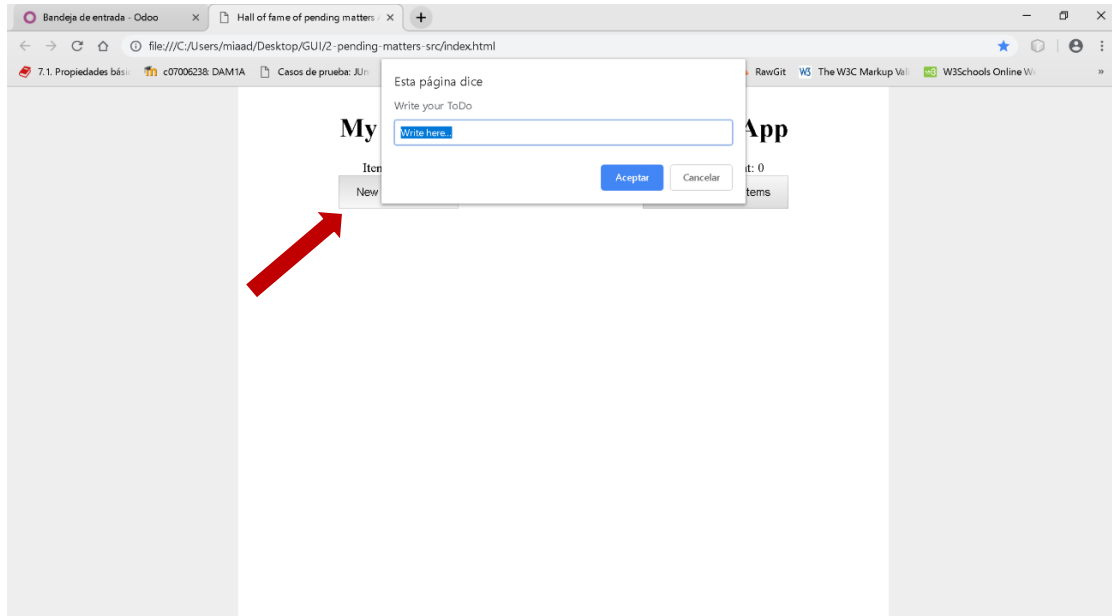

Now, when you run the application you have two buttons: the button for add a new task and the new button to delete all the selected tasks.

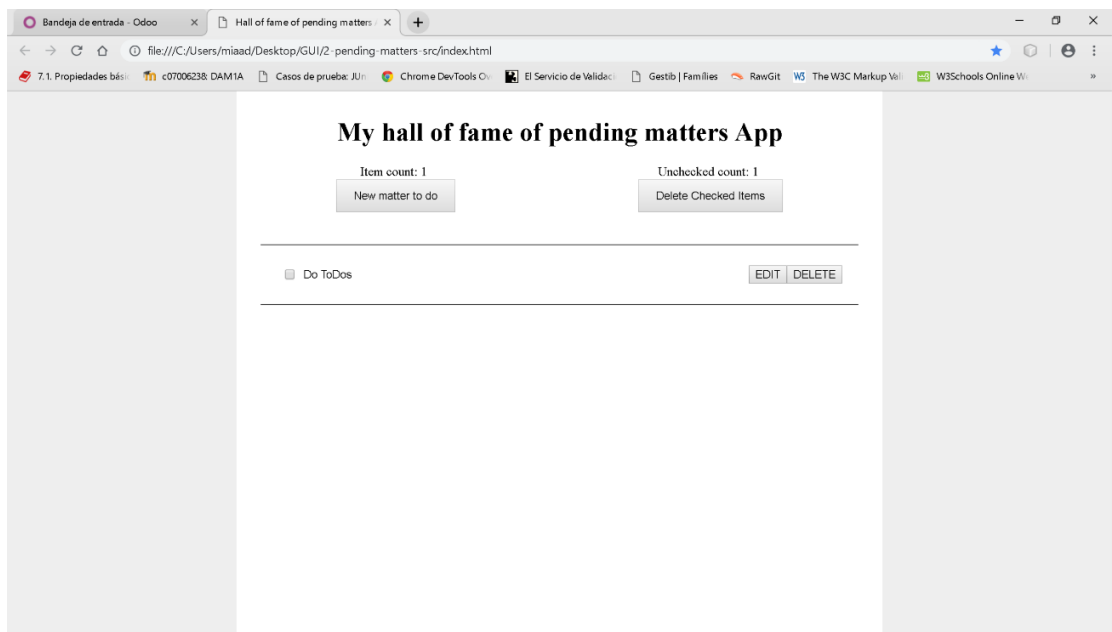

[BACK TO THE CONTENT INDEX](#)

Creating a new task

When we click the “*New matter to do*” button it pops up a non-dialog box in which we can introduce the text of the task. We type the text and then we click the “*Aceptar*” button.

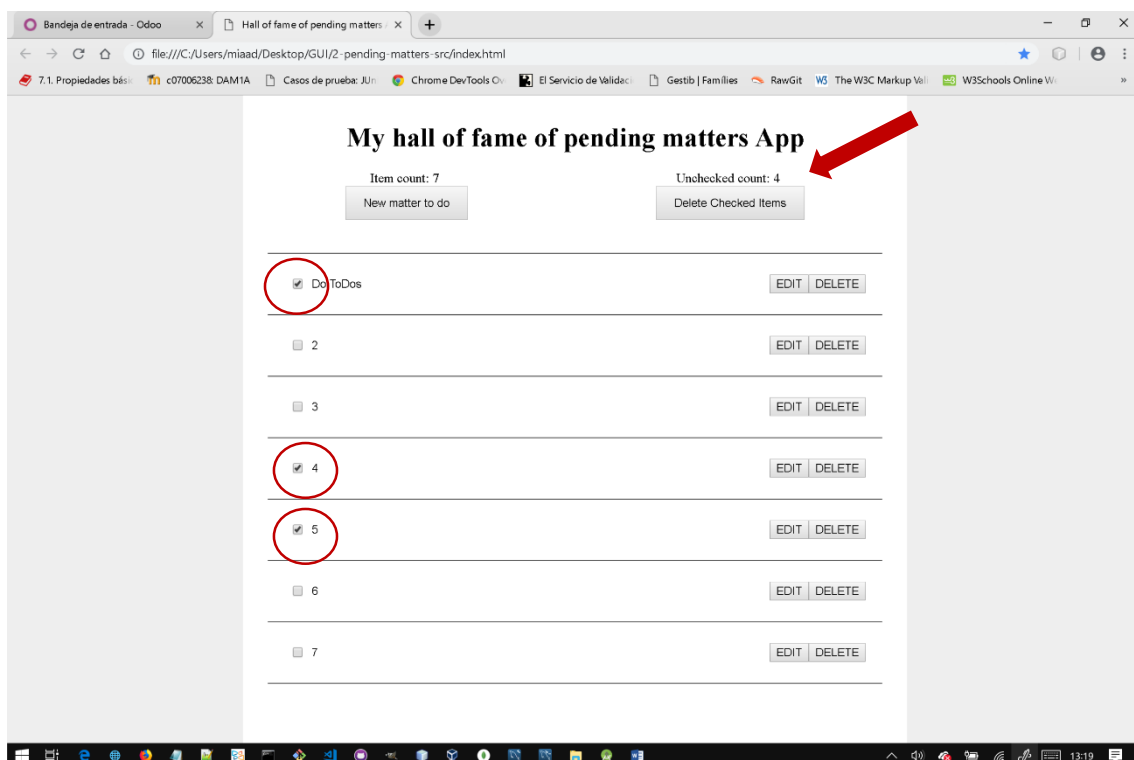

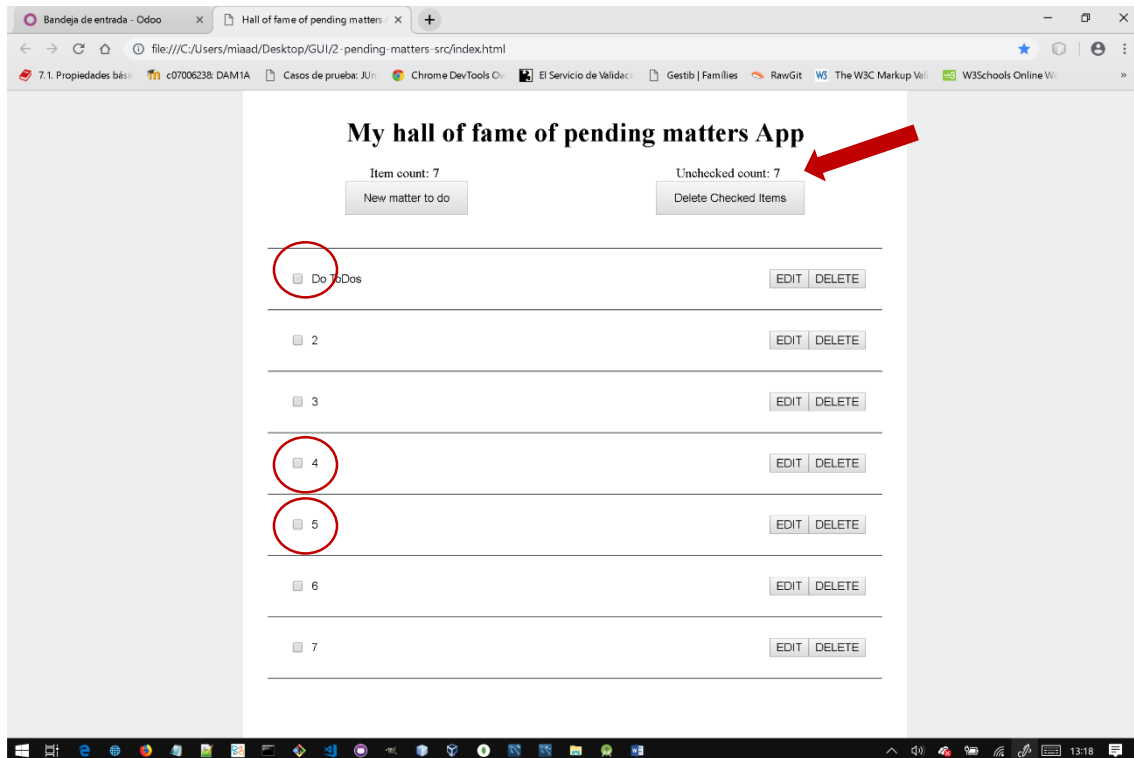

The task will be created with the introduced text. Two additional buttons appear two for each new task, one to edit the task and one for remove the task. and item counter updated. By default, tasks will be unchecked when created.

[BACK TO THE CONTENT INDEX](#)

Checking/Unchecking a task

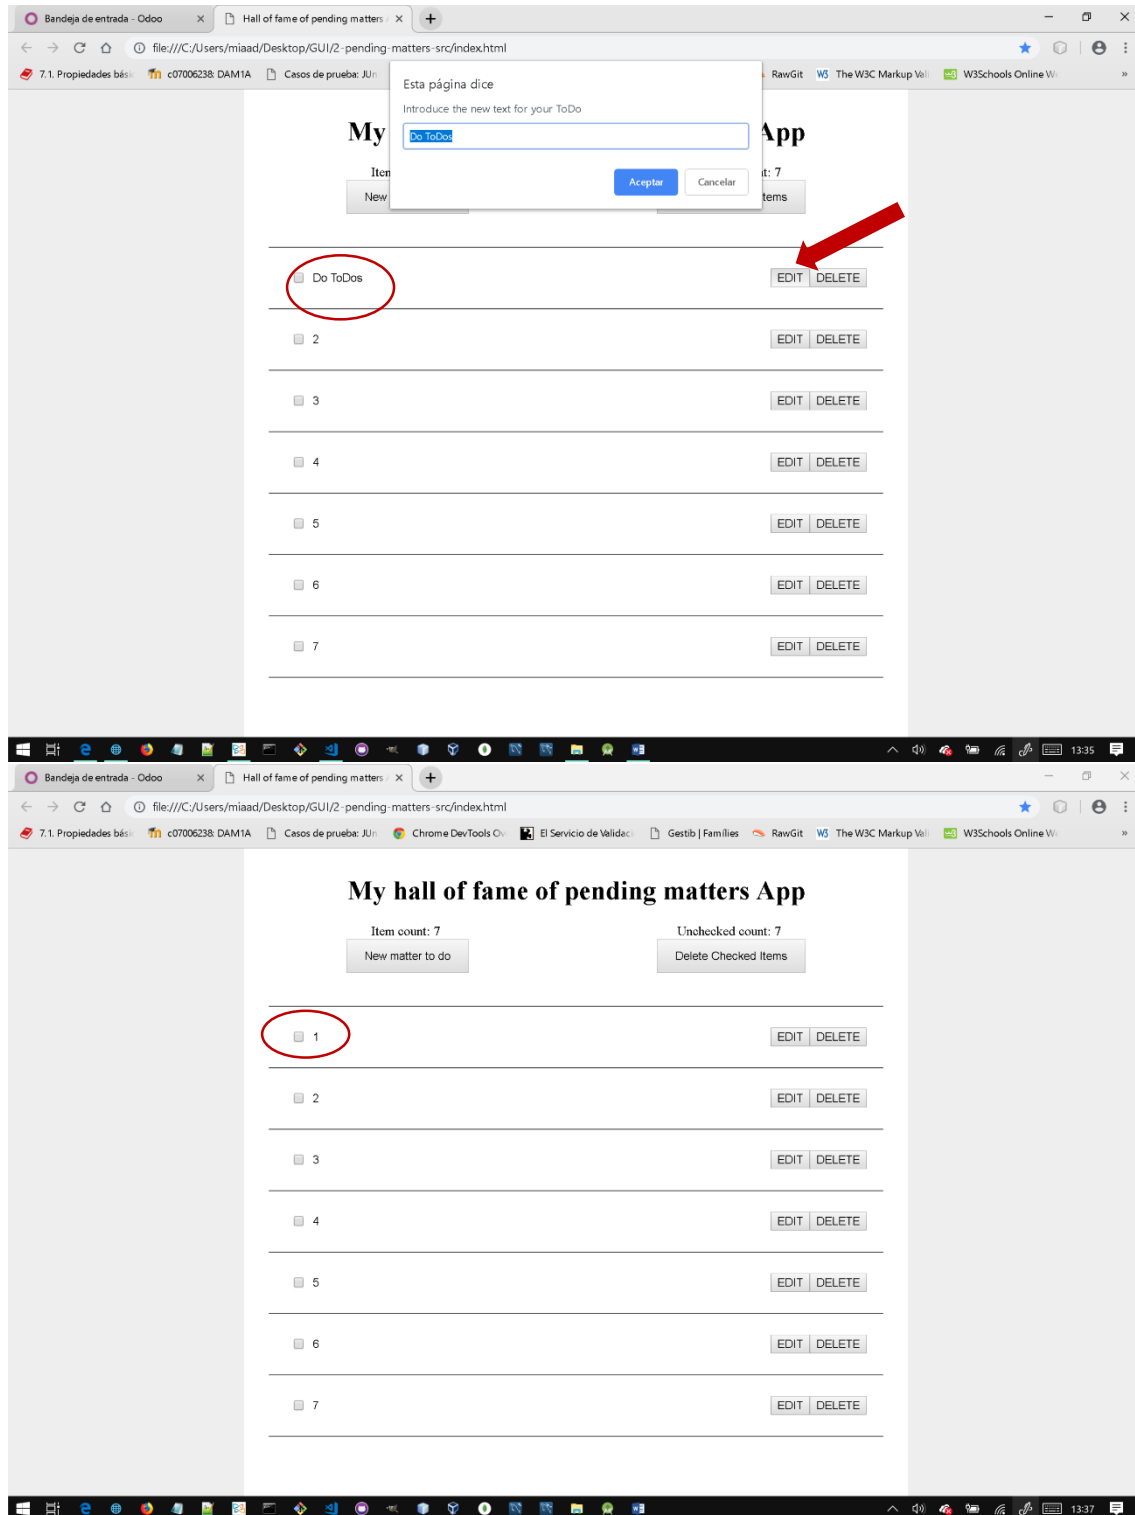

We can check or uncheck tasks by clicking the checkbox square; unchecked counter is refreshed.

[BACK TO THE CONTENT INDEX](#)

Editing the text of a task

User can edit the text of a task once it has been created. When we click the edit button, again a non-modal window with the actual text of the task appears, and we can change this text, click the aceptar button of the dialog and it's all; new text will appear on the task.

[BACK TO THE CONTENT INDEX](#)

Removing a single task

User can remove the desired task by clicking the delete button of the task; no matter if they are checked or unchecked, or the position of the task. Counters will be actualized.

My hall of fame of pending matters App

Item count: 7

New matter to do

Unchecked count: 7

Delete Checked Items

<input type="checkbox"/> 1	EDIT DELETE
<input type="checkbox"/> 2	EDIT DELETE
<input type="checkbox"/> 3	EDIT DELETE
